Art Unit: 3744

SUSPENSION OF PROSECUTION

All claims are allowable. However, due to a potential interference, *ex parte* prosecution is SUSPENDED FOR A PERIOD OF 6 MONTHS from the date of this letter. Upon expiration of the period of suspension, applicant should make an inquiry as to the status of the application.

REASONS FOR ALLOWABILITY

Claims 1-38 are allowed.

The following is a statement of reasons for the indication of allowable subject matter:

As per independent claim 1, the prior art does not teach means for rapidly pulsing the solenoid valve in the bypass line whereby the rate of flow of bypass to the suction line is modulated.

As per independent claim 3, the prior art does not teach means for rapidly pulsing the solenoid valve in the economizer circuit whereby the rate of economizer flow to the compressor is modulated.

As per independent claims 4, 9, 17, 29, and 33, the prior art does not teach a suction valve, in the refrigeration suction line, being cyclable between open and closed positions and operative to cycle with a cycling time shorter than the response time of the system to modulate compressor capacity.

As per independent claim 14, 24, and 35, the prior art does not teach a solenoid valve in the refrigerant fluid suction line operative in response to capacity control signals received from the controller to cycle between a fully open position and a fully closed position to modulate compressor capacity.
